All claims must be made IMMEDIATELY AFTER RECEIPT OF STOCK.

## LIABILITY and NON-WARRANTY

All quotations are for immediate acceptance and subject to stock being sold. All bookings are without liability to us should injury befall stock from frost, hail, fire, or other causes beyond our control, and subject to the standard form Non-Warranty Clause which reads: "**We give no warranty, express or implied, as to description, productiveness, or any other matter, of any nursery stock, seed or bulbs we sell.**"

**MAGNOLIA soulangeana, Saucer Magnolia**

One of our specialties. Color cut of the blossom of this beautiful plant adorns the front cover of this catalog. These showy fragrant flowers appear before the leaves, often in very early Spring. They open light purple at the base of the large petals, shading to pink at the tips, with inside of petals clear pink to white. One of our most beautiful ornamentals. In nature in these latitudes, Magnolia Soulangeana will often have its bloom buds frozen. To offset this, we have a modern cold storage plant in our warehouse. We get these plants dug and in the cold storage usually by mid-January and keep them at just above freezing temperatures, thereby holding their bloom buds dormant. We can make delivery as late in the Spring as you desire and each plant will still have dormant bloom buds. In bloom for you, their sale becomes automatic! 20 feet at maturity.

### RUGOSA ROSES

(Two Year—Own Root)

These are among the hardiest Roses known, and are comparatively free of the pests which usually trouble Roses. Not only are they hardy, but they are tough, they are colorful, and most of them produce beautiful apple like fruit, often having both bloom and fruit on the plants at the same time. Deeply veined leaves, many thorns. An excellent hedge Rose.
